

## **Radon TV Commercial Transcript**

### **:60 Second TV Commercial**

You've known for years that this is the number one cause of lung cancer - smoking. That's why the surgeon general issued this warning. But do you know the number one cause of lung cancer for non-smokers? It's in this room. You can't see it or smell it. It's Radon. Radon is an invisible, radioactive gas that seeps inside your home from underground. It can build up to dangerous levels without notice. Now the surgeon general has issued another lung cancer warning. And whether you smoke or not, breathing radon can cause lung cancer. That's why you need to have your home tested. Protect your family, call 1-800-SOS-RADON. Heed the warning, have your home tested, because radon problems can be fixed.
